

Two billion people watch football.

None of them really watch *alone*.

The match is the heartbeat. The social experience is scattered across screenshots, group chats and stadium nostalgia. There is no purpose-built social arena synced to **the minute the goal happens**.

2 B

GLOBAL FOOTBALL FANS

700 M

AFRICAN FANS, MOBILE-FIRST, UNDERSERVED

90 min

PER MATCH. 7 DAYS OF COMMUNITY AFTER.

5LANGUAGES AT LAUNCH (    )

Live the match. Together. Out loud.

One Flutter app. Four shipped tabs. Same live data heartbeat throughout.

For You

TikTok-style vertical reels of fan posts (image · text · AI caption). 7-day auto-expiring "funny status". Reactions, comments, dwell-time impressions all tracked.

Live

Every active match as a broadcast card. **Featured: 2022 World Cup Final ARG 3-3 FRA** plays via real YouTube clip. Score bug + LIVE badge + commentary timeline overlay.

Match Hub

Hero carousel · live tiles with possession bars · upcoming carousel · recently finished · standings table (real W/D/L/GD/Pts) · top scorers podium. Inspired by 1xBet depth.

Me

Profile · points · level · country · badges · language picker (5 locales). Real-time leaderboard after every finished match.

Predictions · Oracle badge for exact-score

Match Room · WebSocket live events

Auto-spawned polls on red cards

AI captions FR · EN · Lingala · Swahili

AWS-native. Real-time. Production-shaped.

Innovation Sandbox · eu-central-1 · deployed and serving traffic right now.

Flutter Mobile (iOS · Android)

Riverpod · go_router · Dio + JWT refresh · web_socket_channel · video_player + youtube_player_flutter

↓ HTTPS · WSS ↓

EC2 t2.micro · Daphne ASGI · Django 5 + Channels

DRF (auth · feed · matches · ai) · WebSocket fan-out · Celery worker + Beat · match simulator with bot personas

RDS Postgres

Relational data

Redis (Channels)

Live fan-out

S3 + local fallback

User media

Bedrock Claude

Multilingual AI captions

- ⚡ **Real-time fan-out** — a goal event hits one channel group, fans on N devices see the score flip in < 300 ms.
- 📦 **Auto-spawned polls** — server inspects MatchEvent.type; a RED card triggers "Carton rouge mérité ?" without any human in the loop.
- 🤖 **Bedrock Claude 3 Haiku** generates fan post captions in 4 languages (FR · EN · Lingala · Swahili). Cost-bounded, audit-logged, fan-tone prompts.
- 🎬 **Two video pipelines** — video_player for simulated streams · youtube_player_flutter for the featured World Cup match.

Everything a football fan needs, exposed via REST + WebSocket.

Auto-documented via OpenAPI / Swagger UI at </api/docs/>.

DOMAIN	ENDPOINTS	PURPOSE
🔑 Auth	<code>/auth/register</code> · <code>/auth/login</code> · <code>/auth/refresh</code> · <code>/auth/me</code>	JWT access + refresh; auto-retry on 401.
📺 Feed	<code>/feed/for-you</code> · <code>/feed/following</code>	TikTok-style ranked feed, impression-aware.
🗨️ Statuses	<code>/statuses/</code> – 7-day TTL	Funny status: text + media.
📷 Media	<code>/media/upload-url</code> · <code>/media/local-upload</code> · <code>/media/</code>	S3 presign + local fallback (Innovation Sandbox).
💬 Interactions	<code>/reactions</code> · <code>/comments</code> · <code>/impressions</code>	Emoji reactions, comments, dwell-time tracking.
⚽ Matches	<code>/matches</code> · <code>/matches/{id}</code> · <code>/matches/{id}/events</code> · <code>ws://.../ws/match/{id}/</code>	List · detail · event stream · live channel.
🔮 Predictions	<code>/predictions/</code> – Celery scoring at fulltime	Oracle badge for exact-score predictions.
🏆 Gamification	<code>/leaderboard</code> · <code>/badges</code>	Points, levels, achievement unlocks.
🤖 AI	<code>/ai/caption</code> (Bedrock Claude 3 Haiku)	Multilingual fan caption generation.

700 M African fans first. 2 B globally after that.

Mobile-first · multilingual · built by a fan, for fans.

GO-TO-MARKET ROADMAP

- | | |
|---------------|---|
| Q1 '26 | MVP launch in DRC, Portugal, Brazil, France (Lusophone + Francophone first). |
| Q2 '26 | Fan Club subscription (\$1.99/mo) · AR scarf · league partnerships. |
| Q3 '26 | Expand to Anglophone Africa · Argentina · Mexico. Real Bedrock caption rollout. |
| Q4 '26 | Stadium partnerships · second-screen sponsored polls. |

TAM CEILING

2 B fans × \$0.50 ARPU = \$1 B / year

WHY WE'LL WIN

- **Working code · deployed AWS** — no smoke and mirrors. Live URL serving traffic now.
- **All three pillars shipped** — Live arena · 1-week funny status · Bragging rights.
- **Built by a fan, for fans** — country palettes · native player rosters · multilingual.
- **Sandbox-aware** — eu-central-1 · free-tier shaped · no over-provisioning.
- **AWS-native + Kiro-built** — Bedrock · EC2 · RDS · S3 · Channels. Every line in production.

"Two billion fans. One match. One arena. FanPitch — built by the people who actually watch."
